SOYBEANS AND FEED GRAINS ADVANCE - BREAD GRAINS DROP

Soybean prices continued their upward spiral and advanced sharply during the week ended June 30. Feed grains scored moderate upturns, but wheat and rye reacted downward. Active trading in the futures markets, crop and weather news, and world food needs were major market influences.

Winter wheat dropped 4-8¢ per bushel as harvesting of hard wheat moved into full swing in Kansas and Nebraska and movement of soft red wheat got under-way. While receipts increased as harvesting expanded, selling by farmers continued slow. Mill and export demand remained active. Spring wheat declined 1-2¢ even though demand held up well, but durum prices fell 13-15¢ under pressure from large receipts and favorable crop progress. White wheat edged up 1-2¢ in the Pacific Northwest where slow selling met good mill and export demand. Rye lost 6¢, influenced by action in the wheat market and nearness of new-crop rye.

Corn went up 1-3¢ per bushel with good export demand providing ready outlets for spot offerings. Warm weather favored crop development which is about two weeks behind last year, but high temperatures caused some trade concern over the need for rain in parts of the Corn Belt. Oats gained 2-3¢ largely in sympathy with the upturn in corn. Barley was unchanged to 5¢ higher on reduced offerings. Grain sorghum advanced 4-5¢ per cwt. behind strong demand for limited offerings.

Soybeans racked up gains of 21-22¢ per bushel, reflecting aggressive demand for limited spot offerings and furiously active trading on the futures market. Futures prices went up the 10¢ limit on several days and new season's highs were posted almost daily. The continued heavy rate of crushings and exports added to growing trade concern about the close adjustment between supply and demand during the balance of the crop year. Flaxseed held steady at Minneapolis.

	14% protein.....	2.16	-	-	-
Pacific Northwest ...	No. 2 Western White...	1.72	-	-	1.22

1/ The export payment rate for wheat on June 30, was 52¢ per bushel for spring wheat from Duluth, 53¢ for soft red winter from Baltimore, 65¢ for hard winter from the Gulf, and 38¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

^{4/} Corrected.

SOYBEANS SHARPLY LOWER

Soybean markets reacted to the sharp advance of recent weeks and prices eased off considerably at the close of the week ended July 7. Feed grains also weakened slightly but wheat was mostly steady to higher.

Winter wheat averaged unchanged as harvesting was about completed in Kansas. Farm selling continued slow although mill and elevator interest provided broad outlets for spot offerings. Export demand was less urgent. Spring wheat gained 3¢ reflecting active export buying. Mills and elevators competed aggressively for limited country selling. Demand for choice durum was urgent and the better qualities went up 23¢ per bushel. White wheat went up 10¢ in the Pacific Northwest with good export business and farm selling only fair. Rye gained 2¢ reflecting strength in wheat and advancing futures prices.

Corn advanced early in the period but closed on a weak tone with reports of improved prospects for the new crop. Hot weather and some rain favored new-crop development. Prices were mostly unchanged to 2¢ per bushel lower. Oats declined 3¢ per bushel at Chicago and 2¢ at Minneapolis with the new crop making good progress in the Northern States and some marketing in the Chicago area. Barley was unchanged to 2¢ higher in a dull market. No. 3 or better choice malting barley sold in a range of \$1.30-1.38 per bushel at Minneapolis. Grain sorghum dropped 2¢ per cwt. at Ft. Worth as new-crop harvest was under-way in the Rio Grande Valley.

Soybeans dropped 13-18¢ per bushel at the close of the week after a period of active trading. A reaction to the sharp advance of the past few weeks and generally favorable crop prospects were important weakening factors. Soybean meal also declined but oil held steady with good export inquiry. Flaxseed was unchanged at Minneapolis.

Wheat - export prices and export payment rates, 1961 to date	16
Average prices received by farmers, 1961-66	17
Price support loan rates at principal terminals, 1960-66	18
Canadian grains - average monthly prices at Winnipeg, 1961-66	19
Grains - CCC dispositions	20

WHEAT PAYMENT RATES ... for 1966 crop wheat domestic marketing certificates was established at \$1.32 per bushel. This is based on the July 1 parity of \$2.57 per bushel. By law, the domestic marketing certificates for this year's wheat crop are based on parity as of July 1 minus the national average price support loan level (\$1.25 per bushel). The certificate payments involving about \$666 million will be made to nearly 900,000 wheat growers who signed to participate in the 1966 program. They are based on projected production of wheat on 45 percent of participant's allotment -- providing not less than 40.5 percent of the allotment is planted. The certificates are applied to domestic food use of wheat totaling 505 million bushels.

NOTE: Beginning with this issue prices of durum wheat will be quoted for No. 1 Hard Amber Durum Choice wheat at Minneapolis. Most of the No. 1 durum sold at this market is of the choice quality with a few sales of the less desirable type. Buyers pay premiums for durum with large plump kernels that mill a rich yellow color. Eliminating the prices for the less desirable types will reduce the spread which was as high as 40¢ per bushel this winter to 6-8¢.

Grains: Export prices basis prompt or 30-day shipment, July 7, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat	1/	Corn	Soybeans:	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/
			-- Dollars --		
Duluth	No. 1 Heavy Northern				
	Spring, 14% protein...	2.12	-	-	-

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

^{1/} July 1, 1965-June 30, 1966 for wheat, rye, oats, barley, grain sorghum, and flaxseed; October 1, 1965-June 30, 1966 for corn; and September 3, 1965-June 30, 1966 for soybeans.

^{2/} Less than 1,000 bushels.

The Agricultural Stabilization and Conservation Service reported value, as of June 30, 1965 of feed grain certificates issued for crop-years 1963, 1964, and 1965 was \$3,680,039,687. Sales against the certificate pools, by crop year were: 1963, \$119,263,666; 1964, \$345,536,061; and to date in 1965, \$438,854,885. These sales left a combined feed grain certificate value of \$2,776,385,075 as of June 30, 1966.

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION CONSUMER AND MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 14 No. 28

Hyattsville, Maryland 20782

July 15, 1966

GRAIN PRICES GENERALLY HIGHER

Cash grain prices advanced sharply during the week ended July 14. Soybeans climbed to high levels but generally dropped back to prices of a week ago. Wheat and rye led the advance while feed grains showed a more modest gain. Hot, dry weather over large areas was a strengthening factor.

Winter wheat advanced 6-7¢ per bushel from a week ago despite a setback on the closing day. Receipts of hard winter decreased as harvesting moved into Nebraska while receipts of soft red winter increased. Offerings of hard winter continued light. Export demand was active and mill buying aggressive. Spring wheat gained 4¢ with a broad demand from mills as well as from exporters. Durum went up 10-15¢ as mills competed with exporters for limited offerings. Soft white advanced 14¢ per bushel in the Pacific Northwest with a strong buying interest for approaching tenders. Rye went up 5¢ at Minneapolis largely on the basis of higher wheat.

Corn was unchanged to 3¢ higher despite July 1 prospects of a record crop of 4.2 billion bushels. The weather has been ideal for corn growth but the hot weather and a shortage of moisture may hurt the crop unless relieved by rains. Offerings were light and continued in good demand. Oats averaged a penny higher with smaller offerings. Barley was dull and prices 2¢ lower at Minneapolis but unchanged to 1¢ higher on the West Coast. Grain sorghum closed 1-2¢ lower at Ft. Worth with increased harvest in South Texas but went up 5¢ per cwt. at Kansas City.

Soybeans averaged 1-2¢ higher at the close at Illinois points and Minneapolis but dropped 6¢ per bushel at Chicago. Prices advanced sharply following the official announcement of a 7-percent increase in the soybean harvested acreage. Demand remained good for small arrivals. Flaxseed gained 4¢ at Minneapolis with some export buying.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

^{4/} Corrected.

WHEAT AND SOYBEANS LOWER -- CORN HIGHER

Cash grain markets showed a mixed trend during the week ended July 21 with the weather an important factor. Wheat, rye and soybeans declined sharply while corn advanced to new season's high. Other grains showed more modest changes.

Winter wheat declined 4-8¢ per bushel, losing most of the previous week's gain. Receipts of soft red winter wheat increased while offerings of hard winter were more liberal. Demand was good for the increased supplies. Spring wheat dropped 8-16¢ with increased receipts of spring wheat and new-crop arrivals of hard winter from South Dakota. Durum dropped 12-16¢ as export demand fell off. White wheat lost 6-7¢ in the Pacific Northwest. Rye closed 5¢ lower in anticipation of expanded harvest.

Corn advanced 3-5¢ per bushel with hot, dry weather over large areas the main factor. Receipts continued large but demand was quite active. Oats declined 1-2¢ with new-crop arrivals. Barley was unchanged to 2¢ lower in a dull market for light offerings. Grain sorghum held steady at Ft. Worth but gained 7¢ per cwt. at Kansas City behind a good demand.

Soybeans declined 7-8¢ as the new crop continued to make favorable progress over much of the principal producing area. Weakness in the meal market more than offset the stronger oil market. Flaxseed held steady in a dull market at Minneapolis.

GRAIN EXPORTS ... for the fiscal year ended June 30 totaled a record 2,073 million bushels (54 million metric tons) on the basis of inspections for export. This does not include wheat flour or other grain products since they are not subject to the inspection requirement. These exports are around 500 million bushels more than the two previous record years. Corn exports of 668 million were nearly 150 million more than last year and 230 million more than in 1963-64. Grain sorghum exports of 236 million were nearly twice those of 1964-65 while soybean exports of 258 million increased by 48 million bushels. Countries receiving the largest amounts of these grains in million bushels were: Corn - Netherlands 113, Italy 106, United Kingdom 94, Japan 89 and Spain 77; grain sorghum - Japan 73, India 40, Netherlands 38, and Belgium and W. Germany 23 each; and soybeans - Japan 73, Netherlands 51, Spain 18, Italy 16 and Denmark 15.

EXPORTS OF WHEAT ... grain only, totaled a record 797 million bushels during the 1965-66 season on the basis of inspections for export. Of the total exports 270 million bushels were commercial or dollar sales with the balance exported under special programs. The largest of these were exports under Title I of P.L. 480 which totaled 375 million bushels. Exports totaled 71 million under Title IV, 22 million under Title II, 4 million under Title III, 42 million under Barter and 13 million under CCC Credit. India was our largest customer receiving 269 million, most of which was under Title I. However, Japan was our largest cash customer taking 73 million bushels, of which 38 million was Hard Red Winter, 28 million White and most of the balance was Spring. Yugoslavia received 53 million bushels under Title IV while the same amount was shipped to the Netherlands for dollars.

Grains: Export prices basis prompt or 30-day shipment, July 21, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum ^{2/}
			--Dollars--		
Duluth.....	No. 1 Heavy Northern Spring, 14% protein....	2.08	-	-	-
Baltimore.....	No. 2 Soft Red Winter...	1.97	1.55	3.63	1.45
Gulf.....	No. 1 Hard Winter: Ordinary protein..... 14% protein.....	2.12 2.18	1.52 -	3.55 -	2.13 -
Pacific Northwest.....	No. 2 Western White.....	1.91	-	-	1.30

^{1/} The export payment rate for wheat on July 21, was 19¢ per bushel for spring wheat from Duluth, 21¢ for soft red winter from Baltimore, 33¢ for hard winter from the Gulf, and 15¢ for white wheat from the West Coast.

^{2/} No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

TOTAL 1964-65	4,162	52,650	2,028	6,842	521,166	119,435	209,854	916,137

1/ Includes 109,000 bushels of U. S. oats and 291,000 bushels of U. S. barley shipped from stocks in store in Canada.

NOTICE: Shipments of U. S. grain from Canadian ports have been incorporated in the inspections for export tables for wheat on pages 8-11 and for the other grains on pages 12-15. This gives a more accurate total for the quantity shipped by country of final destination. Shipments of wheat by class to Canada compared with transshipments from Canadian ports in parentheses for 1965-66 were as follows, in 1,000 bushels: Hard Red Spring 3,172 (3,129); Hard Red Winter 704 (0); Soft Red Winter 5,303 (4,882); White 1,706 (1,496); Durum 2,417 (2,222) and total 13,302 (11,729). The difference would be accounted for changes in stocks and the quantity in transit from Lake Ports to Canada.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico.

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 9 No. 3

Hyattsville, Maryland 20782

July 26, 1966

Grain prices advanced rather sharply during the April-July period reflecting record exports of several grains, reduced supplies and some concern over prospects for the 1966 crops. Reflecting the advance, prices the first three weeks of July were generally above a year ago. Carryover stocks of wheat were 34 percent below last year. Holdings of the four feed grains stood at 74 million tons -- 8 percent below the previous year. Soybean stocks were slightly above the July 1965 total.

WHEAT ... prices advanced steadily during the April-July period due to the record export demand and some deterioration in the new crop. Hard winter went up over 30¢ per bushel at Kansas City while soft red winter advanced 25¢ at Chicago in the four-month period. Spring wheat gained 28¢ at Minneapolis and white wheat 32¢ per bushel at Portland. Compared with a year ago, prices ranged from 25¢ higher for spring wheat to 45¢ higher for hard winter. Carryover stocks of wheat on July 1 totaled 536 million bushels -- the smallest for that date since 1952. The Commodity Credit Corporation owned 403 million as against 690 million a year earlier. Exports of wheat, flour and products during 1965-66 amounted to a record 867 million bushels -- 11 million above the previous high in 1963-64 and 142 million more than in 1964-65. Milling of 594 million bushels of wheat for flour was 12 million more than a year earlier. Domestic supplies of wheat for 1966-67, based on July 1 conditions, total 1,776 million bushels -- the smallest since 1952-53. Exports of wheat, including flour from United States, Canada, Argentina and Australia during the fiscal year ending June 30, were around 1,850 million bushels -- an increase of 300 million over 1964-65.

RYE ... gained 9¢ per bushel at Minneapolis during the past quarter and finished 12¢ above a year ago. Stocks of 18.5 million bushels in all positions July 1 were 43 percent above last year. Disappearance of almost 30 million bushels was a million more than in 1964-65 due to the increase in exports. Alcohol and milling usage was up slightly. Domestic supplies of rye for 1966-67 total 44 million bushels, about 2 million above 1965-66. The larger carryover almost offsets the smaller crop.

CORN ... prices at the farm, April through June, averaged 5¢ per bushel below last year due in part to the larger available supplies. However, in July market prices advanced 5-8¢ per bushel as record exports and heavy feeding reduced stocks and hot, dry weather threatened the new crop. Stocks of corn in all positions on July 1 totaled 1.8 billion bushels, 120 million below last year and the smallest since 1956. The CCC non-committed inventory totaled 91 million on July 1 as against 477 million a year earlier. The 1966 crop was forecast July 1 at a record 4.2 billion bushels. Corn disappearance, October through June, totaled 3.5 billion bushels -- 350 million more than the same months a year earlier. Exports

reached 531 million as against 405 million last season. Corn remaining for feed totaled 2.7 billion compared with 2.5 billion for 1964-65. Animal units for 1965-66 are estimated at 169.1 million compared with 167.7 million for 1964-65. Feeding of corn per animal unit totaled 15.9 bushels the first 9 months of the season as against 15.0 last year and 14.8 the 5-year average.

OATS ... averaged around a penny per bushel below a year ago during the April-June quarter. But in the first three weeks of July oats generally averaged 5¢ per bushel above a year earlier due in part to prospects for a smaller crop and higher feed grain prices. Carryover stocks of 383 million were 14 percent above a year ago. With production estimated at 897 million bushels, down 6 percent from last year, domestic supplies for 1966-67 total 1,220 million as against 1,242 million for 1965-66. Disappearance of oats, mainly for feed totaled 922 million last season compared with 916 million for 1964-65. Exports of 36 million bushels were sharply above the last year or the 5-year average.

BARLEY ... prices in the April-June quarter were 5¢ per bushel above a year ago. Feed barley prices ranged 6-8¢ above last year the first three weeks of July while malting barley at Minneapolis sold generally 6¢ per bushel lower in the same period. Carryover stocks of 108 million were 6 percent above a year earlier but 25 percent below the 5-year average. With production forecast at 7 percent below last year, domestic supplies for 1966-67 total only 489 million compared with 575 million the 5-year (1960-64) average. Disappearance last season totaled 412 million -- a drop of 33 million from 1964-65, due mainly to smaller feeding. Industrial usage, mainly for beer and alcohol, was up slightly while exports of 75 million increased by 16 million bushels.

GRAIN SORGHUM ... prices averaged 17¢ per cwt. below a year ago during the April-June quarter. Despite a sharp increase in July, prices were mostly 3¢ per cwt. below last year. Stocks of 299 million cwt. in all positions July 1, were 19 percent smaller than a year earlier. Of the total stocks, CCC owned 252 million as against 332 million on July 1, 1965. Disappearance of 391 million cwt. during the first 9 months of 1965-66 was 120 million cwt. more than the corresponding period last season. Exports of 104 million cwt. were more than double those of a year earlier. The remainder of the increase in disappearance was in feed usage.

SOYBEAN ... prices advanced 60¢ per bushel in the April-July period reflecting record exports and crushings. Prices in July averaged 73¢ above July 1965 due in part to concern about the 1966 crop. Stocks of 134 million bushels were 3 million more than a year earlier and 4 million below average. Soybean crushings of 455 million in the September-June period were 50 million more than in the comparable period last season. Exports of 227 million bushels ran some 44 million bushels ahead of the previous year.

FLAXSEED ... advanced gradually during the April-July period and in July sold around 3¢ above a year earlier at Minneapolis. Carryover stocks of 14 million were 3.5 million more than a year ago. The 1966 crop, forecast at 25.6 million, is down 27 percent from last year. On the basis of the July forecast, supplies for 1966-67 total 40 million compared with 46 million for 1965-66. Flaxseed crushings of 22.7 million bushels last season were about 2 million more the previous year while exports of 5.3 million were 1.3 million below 1964-65.

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated.

3/ Does not include Canadian wheat milled in bond, but includes about 10,000,000 bushels of wheat used annually for breakfast food.

4/ Mostly quantity fed, but includes industrial use, waste, loss, and statistical errors in estimates.

5/ July estimate.

Soybeans.....	86,516	35	28,576	15	16	2
Flaxseed	11,128	7,948	6,306	4,070	11,814	2,731

1/ Includes stocks sold but not delivered.

2/ Reported as of June 30, 1966. Includes purchases. Does not include the following quantities of grain outstanding under the 1965-crop price support and resale programs: Wheat 12,358,966 bu.; rye 1,193,021 bu.; corn 156,745,713 bu.; oats 10,262,121 bu.; barley 3,330,961 bu.; grain sorghum 381,709 cwt.; soybeans 9,032,100 bu.; and flaxseed 1,786,185 bushels.

3/ Total deliveries reported through June 30, 1966. Includes deliveries from purchase agreement. May not include all grains delivered from 1964 resale program and does not include following quantities of grains reported outstanding under resale loans as of June 30, 1966. Wheat 68,075,387 bu.; corn 302,717,678 bu.; oats 40,390,256 bu.; barley 4,920,636 bu.; and grain sorghum 22,966,742 cwt.

4/ The principal deliveries from the 1965 corn support program will be made after July 31, the date when loans mature. Therefore, July 1 inventory includes only a small quantity of take-over from the current crop.

Volume 14 No. 30

Hyattsville, Maryland 20782

July 29, 1966

CORN AND SOYBEANS LOWER -- WHEAT MOSTLY HIGHER

Cash grain markets showed a mixed trend during the week ended July 8 with weather and foreign buying important factors. Corn and soybeans declined as much-needed rains improved prospects in many areas. Wheat generally advanced with good demand but rye was lower. Other grains closed mostly on the weak side.

Winter wheat advanced 1-2¢ per bushel with good export and domestic demand. India and Japan were heavy buyers and large bakery interests placed orders for 30-45 days supply of flour. Producer selling continued light. Spring wheat held steady for the lower proteins but declined for 14 percent and above. Flour buying was more active. Durum gained 10¢ with increased export interest. White wheat lost 4¢ in the Pacific Northwest as export business and domestic trading was light. No. 1 soft white was listed at \$1.82 per bushel at Portland. Rye declined 3¢ per bushel at Minneapolis under pressure of harvest movement.

Corn prices were 2¢ lower reflecting reports of rainy weather over much of the Corn Belt and rather liberal movement to terminals. Corn was in a critical condition and rain was badly needed. Oats were unchanged to a penny lower with harvest moving north. Malting barley held steady but feed types lost ground. Grain sorghum declined 1-4¢ per cwt. in sympathy with corn as demand held fair.

Soybeans declined 3-5¢ per bushel as rains improved crop conditions in some areas, but progress is behind normal. Weakness in the meal market was also a factor. Flaxseed held steady in a dull market at Minneapolis.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

GRAIN MARKETS MIXED

Cash grain markets continued to show a mixed trend during the week ended August 4. Soybeans registered sharp advances and corn scored moderate upturns. Durum wheat dropped and winter wheat and sorghum closed a little lower. Other grains looked firm or slightly higher.

Winter wheat finished 1-3¢ per bushel lower despite continued light selling by producers and country elevators. Mill demand was only fair and export trade was quiet. Spring wheat edged up 1-2¢ on smaller offerings, but durum prices dropped 12¢ on sharply curtailed demand. White wheat bids went up 2¢ in the Pacific Northwest but trading was light as farmers' interest centered almost entirely on harvesting. Rye moved up a couple of cents in the face of active harvesting.

Corn ruled mostly 2-3¢ per bushel higher behind aggressive demand for reduced offerings. Growing concern about weather and crop news and the demand-supply balance during the coming season also gave support to the spot market. Oats showed little change. Barley strengthened on the West Coast but registered little or no change elsewhere. Grain sorghum lost 2-4¢ per cwt. as buying interest slacked off. Harvesting moved northward in Texas and favorable crop development was reported in Oklahoma and Kansas.

Soybeans chalked up 11-12¢ advances. Limited offerings met good demand, but weather was still a prime market factor. Rains fell in some areas but overall crop development remained behind normal. Higher oil prices also helped strengthen cash beans. Flaxseed held steady in Minneapolis.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

1/ July 1-29, 1966 for wheat, rye, oats, barley, grain sorghum, and flaxseed; October 1, 1965-July 29, 1966 for corn; and September 3, 1965-July 29, 1966 for soybeans.

The Agricultural Stabilization and Conservation Service reported value, as of July 29, 1966 of feed grain certificates issued for crop-years 1964, 1965, and 1966 was \$2,836,612,245. Sales against the certificate pools, by crop year were: 1965, \$108,195,905; and to date in 1966, \$826,651. These sales left a combined feed grain certificate value of \$2,727,688,689 as of July 29, 1966.

OFFICIAL BUSINESS

Soybean prices compared with market value of soybean oil and meal

	Unit of value	July 1966	June 1966	May 1966	July 1965
Soybean Oil:					
Average price at crushing plant	Cents per lb.	12.4	11.2	11.3	10.0
Value from bushel of soybeans <u>1</u> /	Dollars	1.33	1.20	1.21	1.09
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	97.20	92.70	80.30	74.40
Value from bushel of soybean <u>1</u> /	Dollars	2.30	2.20	1.90	1.78
Value of oil and meal from bushel of soybeans <u>1</u> /	Dollars	3.63	3.40	3.11	2.87
Market price of No. 1 yellow soybeans at Illinois Points	Dollars per bu.	3.49	3.29	3.03	2.79
Spread between soybean price and value of oil and meal	Cents	14	11	8	8

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1964-65.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybean, soybean oil or soybean meal.

Volume 14 No. 32

Hyattsville, Maryland 20782

August 12, 1966

SOYBEANS LEAD MOST GRAINS UPWARD

Soybeans racked up very sharp advances for the week ended August 11. Most other grains, except sorghum, followed the soybean trend and moved onto higher price ground.

Winter wheat closed mostly 3-5¢ per bushel higher. Domestic and export demand was good. Offerings were unusually small for this early in the season as farmers and elevators stuck to a tight holding policy. Receipts tapered off as harvesting was at a well-advanced stage. The announcement of an additional 15 percent increase in acreage next year had been anticipated by much of the trade and had little effect on the cash market. Spring wheat, influenced by a tender of 200,000 tons to India, gained 3-5¢ in the face of continued heavy receipts. Durum advanced 8-9¢ with receipts moving out readily. White wheat moved up 2¢ in the Pacific Northwest as exporters pressed to fill past commitments while farmers were interested more in harvesting than in trading. Rye finished 2¢ higher in Minneapolis.

Corn advanced 1-4¢ with very good demand for limited spot offerings. Production was estimated as of August 1 at 4 billion bushels -- down 6 percent from July 1 and 5 percent below last year. Oats held firm in light trading. Barley closed unevenly at 2¢ lower to 6¢ higher with the loss only on the top of the range at Minneapolis. Grain sorghum lost 4-5¢ per cwt. at Ft. Worth and 6-9¢ at Kansas City as strong domestic and heavy export demand failed to offset the pressure from new-crop offerings.

Soybean prices spiraled upward, advancing 31¢ per bushel. Limited spot offerings met good demand, but the cash market was bolstered mainly by active trading on the futures market, the favorable rate of export inspections, trade anticipation of continued high crushings, and higher oil values. Traders were reported busy evaluating weather news and the August 1 forecast of a record 860-million-bushel soybean crop. Flaxseed held steady in Minneapolis.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

Volume 14 No. 33

Hyattsville, Maryland 20782

August 19, 1966

HARD WINTER WHEAT LOWER - OTHER GRAINS HIGHER

Cash grain markets generally advanced during the week ended August 18, with soybeans showing the largest gain. Hard winter wheat was the exception and closed on a lower level.

Hard winter wheat declined 1-2¢ per bushel reflecting a less active export demand and some increase in country offerings. Despite the loss, mill and elevator demand remained good. Soft red winter wheat was 2-3¢ higher reflecting smaller available supplies. Spring wheat advanced 4¢ as receipts were down and export buying was active. A large volume of spring wheat flour was booked by Minneapolis mills. Durum wheat went up 5-6¢ during the week. White wheat went down 2¢ in the Pacific Northwest but other classes advanced. Rye gained 4-5¢ as carlot receipts dropped at Minneapolis. Reports of unfavorable harvesting weather were received from Europe.

Corn advanced 4¢ in active trading with demand good for reduced offerings. Some concern was expressed for the new crop although rains and cooler weather have improved yield prospects. Oats gained 1-2¢ in fairly active trading. Barley went up 2-4¢ at Minneapolis and 6¢ at California points. Grain sorghum prices were 4-11¢ per cwt. higher as demand improved for all feed grains.

Soybean prices continued to advance with the close 20¢ per bushel above a week ago at Chicago. The sharp advance reflected active futures trading, good domestic and export interest, and low year-end supplies. Recent cool, wet weather aided the new crop over most of the Soybelt. Flaxseed gained 2¢ per bushel at Minneapolis.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
Grains - CCC-owned stocks by States, final June 30, 1966, closing.....	6
Corn - quantity put under price support, repaid, delivered, and outstanding, by States.....	7
Grains - quantity under price support.....	8

PRICE SUPPORT OPERATIONS THROUGH July 31 ... show that farmers put 30.3 million bushels of 1966-crop wheat under loan compared with 56.0 million at the comparable date a year earlier. Only 117,333 cwt. of 1966-crop grain sorghum had been put under loan by July 31 as against 3.7 million a year earlier. Of the 170 million bushels of 1965-crop wheat put under loan, 9 million were delivered to or purchased by CCC. This compares with over 75 million delivered to CCC from the 1964 crop. Through July 31 farmers had put 214 million bushels of 1965-crop corn under loan of which 82 million were redeemed. Loans on 86.5 million bushels of 1965-crop soybeans were reported of which 81.2 million had been repaid.

Grains: Export prices basis prompt or 30-day shipment, August 18, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Pacific Northwest.....	No. 2 Western White....	1.87	-	-	1.30

1/ The export payment rate for wheat on August 18, was 17¢ per bushel for spring wheat from Duluth, 21¢ for soft red winter from Baltimore, 30¢ for hard winter from the Gulf, and 9¢ for white wheat from the West Coast.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

* New crop.

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 14 No. 34

Hyattsville, Maryland 20782

August 26, 1966

GRAIN PRICES MOSTLY LOWER

Cash grain markets reversed the trend of recent weeks and generally declined during the week ended August 25. Oats and barley strengthened but improved crop prospects weakened corn and soybean prices.

Winter wheat declined 2-4¢ reflecting a less active export demand and increased acreage for the 1967 crop. Receipts continued light but the limited offerings were readily absorbed at the lower level. Spring wheat dropped 4¢ with increased receipts of the new crop. Premiums for higher proteins were lowered as the average protein was well above last year. In face of larger marketings, buyers paid more for durum. White wheat was off 1 cent in the Pacific Northwest reflecting congestion at Tidewater elevators. Harvest moved into final stages with the new crop of excellent quality. Rye was down 4¢ in sympathy with the decline in wheat and the dull flour trade.

Corn was unchanged to 3¢ lower as moderately heavy rains and near normal temperatures were beneficial to the new crop over most of the Corn Belt. Demand at the lower level was active but available supplies were light. Oats were 1-2¢ higher as demand firmed up and offerings were down sharply. Barley was steady to 1¢ lower with demand quite strong during most of the week. Grain sorghum weakened with increased harvest of the new crop in Texas. Trading was moderate.

Soybeans dropped 15¢ per bushel at Chicago in a shift to new-crop futures. Prices were up 5¢ at Minneapolis with the drop a week earlier at that market. Futures trading continued active while cash buying was limited by only occasional offerings. Oil and meal prices continued strong. Flaxseed held steady at Minneapolis.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
Wheat - inspected receipts by classes at selected markets, July	6-7
Grains - inspected receipts at selected markets, July	8-9
Grains - CCC-owned stocks by States, July 31, 1966	10
U.S. Grains - Stocks, receipts and movement from Canadian ports, July .	11
Grains - United States exports, July	12

NOTE: A new table showing movement of U.S. grain through Canadian elevators during July is shown on page 11 of this report through the courtesy of the Statistician's Office of the Board of Grain Commissioners for Canada. Receipts of U.S. grain at licensed elevators and overseas exports by port and country of destination as well as beginning and ending stocks are reported. Receipts do not include grain shipped from the United States direct to crushing mills, processors or feed plants for consumption in Canada. Grain transferred from these elevators for consumption in Canada is shown in the table.

REVISED STATE ACREAGE ALLOTMENTS ... for 1967-crop wheat were established to reflect the increased acreage. The new national allotment for 1967 is larger by 16.6 million acres, or 32 percent, than the 51.6-million-acre effective allotment for 1966-crop wheat. Because of the increased 1967 allotment, the domestic certificate allocation percentage has been reduced to 35 percent. There is no wheat acreage diversion program for 1967 so land formerly diverted will be available for wheat or other crops.

Grains: Export prices basis prompt or 30-day shipment, August 25, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

WEEKLY
SUMMARY
AND
STATISTICS

GRAIN DIVISION CONSUMER AND MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 14 No. 35

Hyattsville, Maryland 20782

September 2, 1966

GRAIN PRICES MOSTLY LOWER -- SPRING WHEAT HIGHER

Cash grain prices generally declined during the week ended September 1. Spring wheat and flaxseed were exceptions and closed on a firm tone with prices higher. Commodity Credit Corporation discontinued payment-in-kind export certificates on August 26 except for short-term CCC export credit sales and existing barter commitments. Export payment will be made in cash as was the practice prior to 1956.

Winter wheat declined a penny reflecting limited domestic buying and slow export interest. Flour mills were restricting production due to the limited flour sales. Producers and country elevators continued a tight holding policy. Spring wheat advanced 1-3¢ despite rather large receipts. Flour business was slow but running time was heavy to fill previous orders and dealers purchased wheat to replace the quantity ground. Durum wheat was steady with smaller offerings readily absorbed. White wheat was off 1-2¢ in the Pacific Northwest due to the embargo. Rye averaged about unchanged with a fair demand for the better quality.

Corn declined 1-3¢ reflecting in part the resistance to the recent advances. Offerings continued light but commercial interests were slow. Below normal temperatures slowed maturity but the additional moisture maintained good crop conditions. Oats dropped 2-3¢ with supplies moderate. Good quality malting barley held steady with smaller receipts but feeding barley was lower along with the corn. Grain sorghum declined 2¢ per cwt. at Kansas City but advanced about that much at Ft. Worth.

Soybeans were irregular during the week but closed 1-3¢ per bushel lower. Trading was seasonally light with timing of new-crop supplies in doubt. Progress of the new crop was normal to slightly above with prospects good in all areas. Meal prices continued strong but oil declined. Flaxseed advanced 2¢ as additional supplies were needed to meet present requirements.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

September 9, 1966

SOYBEANS SHARPLY LOWER - WHEAT HIGHER

Soybeans declined sharply during the week ended September 8 reflecting nearness of new-crop supplies. Wheat advanced with good export and domestic demand. Corn and grain sorghum declined while other grains showed little change.

Hard winter wheat advanced 4¢ as receipts dropped to the lowest level of the season. Mill demand was strong with the stepped-up grind exceeding purchases. Export bidding was active while producers continued their tight holding policy. Soft red winter wheat closed 2¢ above a week earlier. Spring wheat went up 4¢ reflecting large export sales, heavy prospective grind and limited selling on the part of producers. Durum gained 6-10¢ as 1 1/2 million bushels were sold for export. Soft white moved sharply up 4-5¢ in the Pacific Northwest reflecting substantial flour business and good export interest. Rye markets strengthened with prices 3¢ higher in partial sympathy with the wheat market and also due to sharply lower receipts.

Corn was mostly 1-2¢ lower as nearly ideal weather favored the new crop. Supplies were adequate for the rather good demand but new-crop marketings are expected early. Oats were unchanged to a penny higher as small receipts met ready acceptance. Barley gained about 2¢ per bushel at Minneapolis due to the light arrivals but held about unchanged on the West Coast. Grain sorghum prices were 3¢ per cwt. lower at Ft. Worth reflecting nearness of the new crop but were slightly higher at Kansas City.

Soybeans dropped 30-35¢ per bushel reflecting an adjustment to new-crop basis. Only a few truckloads were received at Indiana and Illinois points. Weather and crop reports indicate favorable conditions for development of the new crop. Oil and meal prices were also lower. Flaxseed held steady in light trading at Minneapolis.

CANADIAN WHEAT SUPPLIES ... for 1966-67 total a record 1,223 million bushels on the basis of the August estimate of production and the August 1 carryover. This is 61 million more than supplies for 1965-66 and 12 million above the previous record in 1963-64. A crop of 800 million bushels was indicated by August 15 conditions -- 151 million more than the 1965 crop and 76 above the previous high in 1963. The large crop more than offset the smallest carryover in 5 years, totaling 423 million as against 513 million in 1965. Exports of 581 million bushels during the 1965-66 season were only slightly below the 1963-64 record but 180 million more than in 1964-65.

Food for Peace Authorizations
August 26-September 6, 1966

Country	Date	Number	Commodity	Quantity	Market Value
				Metric tons	1,000 dollars

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

1/ July 1-August 26, 1966 for wheat, rye, oats, barley, grain sorghum, and flaxseed; October 1, 1965-August 26, 1966 for corn; and September 3, 1965-August 26, 1966 for soybeans.

The Agricultural Stabilization and Conservation Service reported value, as of July 31, 1966 of feed grain certificates issued for crop-years 1964, 1965, and 1966 was \$2,875,780,935. Sales against the certificate pools, by crop year were: 1965, \$115,217,386; and to date in 1966, \$843,226. These sales left a combined feed grain certificate value of \$2,759,720,323 as of August 26, 1966.

September 16, 1966

SOYBEAN PRICES BREAK SHARPLY - OTHER GRAINS UNSETTLED

Soybean prices broke sharply during the week ended September 15. Most other grains shared the downturn early in the period but made some late-week recovery and closed not too much above or below the previous week. Spot markets were unsettled as traders busied themselves evaluating crop and weather news.

Winter wheat closed on a generally firm note. Producers and country elevators continued to display a tight holding tendency. Moderate offerings met strong mill demand. Export trade was on the quiet side. Spring wheat eased off a penny behind large receipts but durum went up 4-10¢ on active mill and export demand. White wheat prices softened in the Pacific Northwest but the market was stabilized to some extent by good export business, less congestion at tidewater terminals, and improved selling by farmers. Rye lost 2¢ largely in sympathy with the downturn in other grains.

Corn finished mostly unchanged although prices were off 1 or 2¢ at a couple of markets. Demand held up fairly well and partially offset the early weakening influence of a 3 percent larger crop this year. Oats firmed up as small receipts found ready demand. Barley fluctuated within a narrow range and at the close was not more than 2¢ above or below the week before. Trading was rather dull. Grain sorghum lost 4-7¢ per cwt. reflecting new-crop harvest pressure and prospects for a record 716-million-bushel crop this year.

Soybean prices dropped 12 to 31¢ continuing the sharp drop of a week earlier. The break in prices occurred early in the week influenced by the increased production estimate of 926,000,000 bushels, released September 9, which was 65,000,000 above a month earlier and considerably in excess of trade expectations. Below normal temperatures in the eastern half of the Corn Belt continued to hold progress behind normal, while in Iowa, Minnesota, and the Northern Plains States, soybeans were generally progressing on schedule. Flaxseed markets weakened slightly reflecting fairly large receipts. Harvest of the new crop was reported in full swing in North Dakota. No. 1 flaxseed declined 2¢ at Minneapolis.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

Hyattsville, Maryland 20782
September 23, 1966

**WEEKLY
SUMMARY
AND
STATISTICS**

GRAIN MARKETS DROP

Cash grain prices reacted downward under harvest pressure during the week ended September 22. Wheat and soybeans showed the sharpest losses, while most other grains registered moderate declines.

Winter wheat finished 10-16¢ per bushel lower, influenced by the lack of fresh domestic and export demand, larger production in other major wheat-producing countries, and the possibility that India may not take as much U. S. wheat this season as it did last year. Spring wheat lost 10¢ and durum dropped 10-12¢. Demand was only fair in the face of lighter receipts. White wheat declined 3¢ in the Pacific Northwest where selling by farmers continued good and prospects for export business dimmed. Rye lost 8¢ largely in sympathy with the decline in other grains and lower futures prices at Chicago.

Corn closed 1-8¢ per bushel lower as country selling picked up and demand slowed with buyers becoming more cautious in the face of impending harvest. Oats lost 2-6¢ in sympathy with the general downturn. Barley was generally unchanged in quiet trading. Grain sorghum finished 1-5¢ per cwt. lower as new-crop harvest pressure mounted and demand for moderate offerings slowed.

Soybeans turned unevenly 5-20¢ per bushel lower in further adjustments to a new-crop basis. Spot demand was slow and the market was under harvest-time pressure. Flaxseed held steady at Minneapolis.

Soybeans - imports into Canada, 1962-66	14
Soybeans - inspections for export by grades, by ports, 1965-66	15
Soybeans - quantity processed at mills, United States, 1961-66	16

Food for Peace Authorizations and Agreement
September 8-20, 1966

Country	Date	Number	Commodity	Quantity	Market Value
<u>AUTHORIZATIONS</u>				Metric tons	1,000 dollars
Persigas 1/.....	Sept.16	32-804	Wheat 2/	4,000	250
India	Sept.20	39-217	Grain sorghum	230,000	11,677
Jordan	Sept.20	73-03	Corn	20,000	1,220
<u>AGREEMENT</u>					
Tunisia	Sept.19	-	Wheat	2.2 mil.bu.)	5,730
			Barley	1.8 mil.bu.)	
			Corn or Grain		
			sorghum	1.6 mil.bu.	2,400

- 1/ Persian Gas Distribution Company, S.A., Tehran, Iran.
2/ White wheat and soft red winter wheat.

Grains: Export prices basis prompt or 30-day shipment, September 22, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/ Grade	Price	Corn No. 2 Yellow	Soybeans: No. 2 Yellow	Barley or Grain Sorghum 2/
			-- Dollars --		
Duluth	No. 1 Heavy Northern Spring, 14% protein...	2.07	-	-	-
Baltimore	No. 2 Soft Red Winter...	1.89	1.52	3.10	1.41
Gulf	No. 1 Hard Winter: Ordinary protein..... 14% protein.....	2.06 2.22	1.53 -	3.16 -	2.37 -
Pacific Northwest ...	No. 2 Western White....	1.88	-	-	1.29

1/ The export payment rate for wheat on September 22, was 20¢ per bushel for spring wheat from Duluth, 15¢ for soft red winter from Baltimore, 26¢ for hard winter from the Gulf, and 7¢ for white wheat from the West Coast.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

* Corrected.

1/ Country breakdown includes grain only; grand total includes grain and products. 2/ Includes seed corn, except sweet and exports for relief.
3/ Destination of exports of products will be published at a later date.

SOYBEAN PRICES UP - PRODUCTION AND DISAPPEARANCE SET RECORDS

Soybean prices climbed upward during the final quarter of the September 1, 1965-August 31, 1966, marketing year and finished near the highest points in several years. Carryover stocks and record 1965 production provided an all-time high supply of soybeans for the 1965-66 season. However, record crushings and exports combined to establish a new all-time record utilization of soybeans last season. The 1966-67 soybean supply is expected to set a new record of 961 million bushels.

Prices of soybeans, while fluctuating somewhat on a day-to-day and week-to-week basis, advanced steadily during the June-August quarter. At the end of the period, prices at principal markets ranged from 50-65¢ per bushel higher than the previous quarter's closing averages. They also ran 88¢ to \$1.00 higher than the previous year's closing prices and stood near the highest levels in about 12 years. Spot prices broke sharply in September--the first month of the new marketing season--when the estimate called for a record 1966 soybean crop and the balance between supply and demand for 1965-crop soybeans apparently would not be as close as had been anticipated earlier.

Disappearance of soybeans during the September 1965-August 1966 season reached an all-time high of 838 million bushels. This was about 98 million bushels, or 13 percent, greater than the former record of 739 million bushels set in the 1964-65 season. Some 538 million bushels of soybeans--a new record--were crushed for oil during the past season. This was around 59 million bushels more than the previous record crushings of 479 million bushels in 1964-65. Exports of soybeans last season hit an all-time high of about 250 million bushels--some 37 million bushels more than the previous season's former record. Seed usage of about 42 million bushels ran 2 million bushels above the previous year.

Of the 250 million bushels of soybeans exported from the United States during the 1965-66 season, nearly 70 percent of the total was shipped out through Gulf Coast ports. Almost 22 percent went through the Great Lakes ports, and the balance was exported from Atlantic Coast ports. About three-fourths of the U. S. soybeans exported went to five countries--Canada, West Germany, The Netherlands, Spain, and Japan. About half of the 31 million bushels shipped to Canada were later transshipped to overseas destinations.

Carryover of 1965-crop soybeans in all storage positions on September 1, 1966, totaled nearly 36 million bushels--almost 6 million bushels more than a year earlier. This carryover and the estimate of a record 926-million-bushel 1966 crop indicate the soybean supply for the 1966-67 marketing year will be around 961 million bushels--the largest supply on record.

September 2/	12.7	1.36	90.50	2.14	3.50	3.24	.26

1/ Based on average outturns which were as follows: 1963-65 - one bushel equals 11.0 pounds oil and 48.0 pounds meal and 1965-66 - one bushel equals 10.7 pounds oil and 47.5 pounds meal.

2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

1/ Carryover stocks for September 1, 1966 reported by Statistical Reporting Service. Prior to 1965, carryover reported for October 1. These were adjusted to a September 1 basis by Economic Research Service, Fats and Oils Situation, August 1965.

2/ Mostly quantity fed, but includes waste, loss, and statistical errors in estimates.

3/ July based on official Census data; August based on inspections for export.

Source: Stocks, production and seed usage from Statistical Reporting Service, exports and crushings from Bureau of the Census.
